

MOP SYSTEMS

Quick, clean and easy

Efficient cleaning of floors, walls and other large surfaces is critical to the overall cleanliness of the production environment. BCR® Mop Systems replicate the most effective way to clean a surface – wiping. Berkshire's mop systems are easy to use, highly effective and quick. The system is very flexible, combining a wide range of alternative Mop Wipers designed for particular levels of cleanliness with a range of Flat Mop Heads.

Applications

ISO Class 3-7 / Floors, Walls and Ceilings

Berkshire's Flat Mop Head is light and easy to maneuver, even with wet wipers attached. The stainless steel springs or plastic eyes hold multiple mop wipers in place and are very easy to operate. The bottom of the mop is smooth and has no lines or grooves where bacteria or other contamination can settle.

Applications

ISO Class 3–7 / Floors, walls and ceilings / Wet or dry with a range of solvents

Berkshire Mop Wipers are designed to minimize and remove cleanroom contamination in a wide range of applications and are manufactured to the highest quality standards, offering consistent performance every time. Mop Wipers range from critical sealed edge 100% knitted polyester to controlled process nonwoven wipers. All the wipers are disposable and measured to fit the Mop Head system. More than one wiper can be attached to the mop head at a time. After mopping the area the outer wiper can be disposed of and the remaining wipers are ready for the next mopping phase. This guarantees a fresh wiper is used for each new phase, maximizing the efficiency of the cleaning.

Non-standard options:

Other wipers are available in non-standard sizes in both dry and presaturated formats. Please contact us for details of these and other non-standard options.
